Job ID: Job-0022 - Shift Engineer 2nd Class Power Engineer

Description: As Shift Engineer, you will lead the Power and Recovery department in its role to power the production of a high quality, internationally demanded product. Working with the Power and Recovery Superintendent you will provide leadership and supervision to a group of Engineers and work closely with maintenance and production to ensure safety and productivity.

In this position you will:

- Lead a team of 3rd and 4th Class engineers in the safe and efficient operation of a 1st Class boiler.
- Work with Production, Technical and Maintenance Supervisors.
- Provide coaching and development.
- Respond to safety, environmental emergency situations.

The successful candidate will hold a Second Class Power Engineering Certification, have superior technical knowledge, demonstrate effective leadership and sound communication skills. Preference will be given those who have an interprovincial standardized ticket.

This opportunity is located in Port Alice on Northern Vancouver Island in British Columbia, Canada. Port Alice is a small scenic community with good housing prices, ocean views and excellent outdoor activities including golf, fishing and hunting. This opportunity at a dissolving sulphite mill is a great chance to implement new upgrades and work with older equipment.

Salary: \$100,000 +, Start Date: 24/07/2006, Location: Port Alice, BC Northern Vancouver Island
